

Software Development Intern

Location: On-site (Kigali, Rwanda).

Overview:

We are seeking a highly motivated and analytical intern to support the development of data-driven insights and analytics solutions. The selected candidate will contribute to the design and implementation of an interactive dashboard, perform exploratory and analytical data tasks, and assist in performance reports. The intern will also contribute to the development of web-based data visualization platforms. The position provides practical experience in web-based data visualization and modern dashboard development.

Key Responsibilities:

- Assist in developing different projects using SQL, Python, Javascript, or PHP, etc
- Extract, clean, and analyze data from reports to develop the web-based Dashboard
- Support the creation of automated reports and data visualizations
- Collaborate with the team to translate data into clear insights on Dashboards
- Learn and apply best practices in data management and dashboard development

Requirements:

- Junior/Senior Students or recent Graduate in Information Management Systems, Computer Science, Data Science, IT or any other related field.
- Basic knowledge of SQL, Python, JavaScript, or PHP
- Experience using AI-assisted development tools
- Familiarity with data analysis and financial data is an advantage
- Understanding of databases, data structures, and algorithms

- Strong attention to detail and problem-solving skills
- Willingness to learn and work in a collaborative environment

What the Intern Will Gain:

- Hands-on experience working on building real-world projects
- Exposure to financial and operational data analysis
- Mentorship and practical learning opportunities
- 6 weeks of Financial analysis training

Time Commitment: Full-time (8:30 AM – 5:30 PM, Monday to Friday)

Application Deadline: 15 April 2026.

Only shortlisted candidates will be contacted.
